

POWEROIL SHUTTERING FLUID 8

POWEROIL SHUTTERING FLUID is an excellent low viscosity shuttering oil specially formulated with high performance base oil and excellent de-molding additives package. It offers good surface finish to the concrete.

CHARACTERISTICS	POWEROIL SHUTTERING FLUID 8
Density @ 29.5°C.	0.82
Kinematic Viscosity, Cst @ 40 °C.	8
Spreadability	Very good

The above properties are typical values and do not constitute specification of the product

* Fresh coating of Poweroil Shuttering Fluid should be protected from rain.

APPLICATION:

- Recommended for use in the production of concrete sleepers and mould releasing of concrete structures.

PERFORMANCE BENEFITS:

- Offers very good surface finish to the concrete.
- Excellent mould releasing characteristics.
- Non-toxic
- Increased wooden plank life /metal shutter life

COVERAGE (Typical):

Timber : 20 Sq mtrs/Ltrs

Steet/ Plastic: 40 -50 Sq mtrs/Ltrs
