

SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

1.1	Product Identifier	
	Product name	POWEROIL LC 2 PTFE
	Product description	GREASE
	Product type	Thick Paste
1.2	Identified uses	
	Distribution of substance Formulation & (re)packing of	Industrial
	substances and mixtures Manufacture of substance Functional Fluids	Industrial Industrial Industrial
1.3	Details of the supplier of the safet	
	Supplier/Manufacturer	APAR Industries Limited 18 T.T.C., M.I.D.C. Industrial Area, Thane Belapur Road, Rabale, Navi Mumbai – 400701. India. +91 22 61110444 (Office hours 9.30am to 17.00pm) www.apar.com
1.4	e- mail address of person responsible for this SDS	hse@apar.com +91 9833811132
1.4	Emergency telephone number	+71 7033011132

SECTION 2 HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture Product definition Mixture <u>Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]</u> Asp. Tox. 1, H304

This product is not classified as dangerous according to Directive 1999/45/EC and its amendments. See sections 11 and 12 for more detailed information on health effects, symptoms and environmental hazards

2.2 Label elements

Hazard pictograms

Signal word Hazard statements Precautionary statements Prevention	No Signal Word No known significant effects or critical hazards Not applicable Not applicable
Response	Not applicable Not applicable Safety Data Sheet available on request
Storage	Not applicable
Disposal	Not applicable
2.3 Other hazards	Defatting to the skin Note: High Pressure Applications Injection through the skin resulting from contact with the product at high pressure constitutes a major medical emergency. Refer Notes to physician' under First-Aid Measures, under Section 4 of this Safety Data Sheet

SECTION 3 COMPOSTION	/ INFORMATION ON INGREDIENTS	
3.2 Mixtures	Mixture	

APAR Industries Limited

Safety Data Sheet Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830.

Product/Ingredient name	Identifiers	%	Classification Regulation (EC) No. 1272/2008 [CLP]	Туре
Lithium Hydroxide, Monohydrate	1310-66-3	< 3	Acute Tox.4 H302 Harmful if swallowed Skin Corr. 1B H314 Causes severe skin burns and eye damage	[1]
Zinc alkyl Dithiophosphate	68649-42-3	< 1.0	Aquatic Chronic 2 H411: Toxic to aquatic life with long lasting effects	[1]

The classification as a carcinogen need not apply if it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or PvBs or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

SECTION 4 FIRST AID MEASURES

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects		
Eye contact	Eye contact may cause redness and transient pain.	
Inhalation	Inhalation of oil mist or vapors at elevated temperatures may cause respiratory irritation.	
Skin contact	No known significant effects or critical hazards.	
Ingestion	May be fatal if swallowed and enters airways.	
4.3 Indication of any immediate medical attention and special treatment needed		
Notes to physician	Due to low viscosity there is a risk of aspiration if the product enters the lungs. Treat symptomatically.	
Specific treatments	Always assume that aspiration has occurred.	

APAR Industries Limited

Safety Data Sheet Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830.

SECTION 5 FIRE FIGHTING MEASURES 5.1 Extinguishing media Dry chemicals. Foam. Carbon dioxide (CO₂). Water spray or foam. Suitable extinguishing media Do not use, direct water jets on the burning product; they could cause splattering and spread the fire. Unsuitable extinguishing media Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam. 5.2 Special hazards arising from the substance or mixture Hazards from the substance In a fire or if heated, a pressure increase will occur and the container may burst. or mixture This substance will float and can be reignited on surface water. Hazardous thermal Incomplete combustion is likely to give rise to a complex mixture of airborne solid and liquid particulates, decomposition products gases, including carbon monoxide, H2S, SOx (sulfur oxides) or sulfuric acid and unidentified organic and inorganic compounds. 5.3 Advice for firefighters Special precautions for firefighters Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Special protective equipment for fire-fighters Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. SECTION 6 ACCIDENTAL RELEASE MEASURES 6.1 Personal precautions, protective equipment and emergency procedures Avoid breathing vapor or mist. Keep non-involved personnel away from the area of spillage. Alert For non-emergency personnel emergency personnel. Except in case of small spillages, the feasibility of any actions should always be assessed and advised, if possible, by a trained, competent person in charge of managing the emergency. Stop leak if safe to do so. Avoid direct contact with the product. Stay upwind/keep distance from source. In case of large spillages, alert occupants in downwind areas. Eliminate all ignition sources if safe to do so. Spillages of limited amounts of product, especially in the open air when vapors will be usually quickly dispersed ,are dynamic situations, which will presumably limit the exposure to dangerous concentrations. Note : recommended measures are based on the most likely spillage scenarios for this material; however, local conditions (wind, air temperature, wave/current direction and speed) may significantly influence the choice of appropriate actions. For emergency responders For this reason, local experts should be consulted when necessary. Local regulations may also prescribe or limit actions to be taken. Small spillages: normal antistatic working clothes are usually adequate. Large spillages: full body suit of chemically resistant and thermal resistant material should be used. Work gloves providing adequate chemical resistance, specifically to aromatic hydrocarbons. Note : gloves made of PVA are not water-resistant, and are not suitable for emergency use. Safety helmet, antistatic non-skid safety shoes or boots. Goggles and /or face shield, if splashes or contact with eyes is possible or anticipated. Respiratory protection : A half or full-face respirator with filter(s) for organic vapours (and when applicable for H2S) a Self-Contained Breathing Apparatus (SCBA) can be used according to the extent of spill and predictable amount of exposure. If the situation cannot be completely assessed, or if an oxygen deficiency is possible, only SCBA's should be used. Prevent product from entering sewers, rivers or other bodies of water. If necessary dike the product with **6.2** Environmental precautions dry earth, sand or similar non-combustible materials. In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. In case of small spillages in closed waters (i.e. ports), contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents. If possible, large spillages in open waters should be contained with floating barriers or other mechanical means. If this is not possible, control the spreading of the spillage, and collect the product by skimming or other suitable mechanical means. The use of dispersants should be advised by an expert, and, if required, approved by local authorities.

6.3 Methods and material for containment

and cleaning up	
Small spill	Stop leak if without risk. Absorb spilled product with suitable non-combustible materials.
Large spill	Large spillages may be cautiously covered with foam, if available, to limit vapour cloud formation. Do not
	use water jet. When inside buildings or confined spaces, ensure adequate ventilation. Transfer collected
	product and other contaminated materials to suitable containers for recovery or safe disposal.
6.4 Reference to other sections	See Section 1 for emergency contact information.
	See Section 8 for information on appropriate personal protective equipment.
	See Section 13 for additional waste treatment information.
SECTION 7 HANDLING AND STO	DRAGE
7.1 Advice on general occupational	
	accumulate in the workplaces and should never be kept inside the pockets. Eating, drinking and smoking
hygiene Storage	should be prohibited in areas where this material is handled, stored and processed. Wash hands
	thoroughly after handling. Change contaminated clothes at the end of working shift. See also Section 8 for
	additional information on hygiene measures.
	Storage area layout, tank design, equipment and operating procedures must comply with the relevant
7.2 Conditions for safe storage,	regional, national or local legislation. Storage installations should be designed with adequate bunds in case
including any incompatibilities	of leaks or spills. Cleaning, inspection and maintenance of internal structure of storage tanks must be done
	only by properly equipped and qualified personnel as defined by national, local or company regulations.
SECTION 7 HANDLING AND STO	
7.2 Conditions for safe storage,	Store separately from oxidizing agents.
including any incompatibilities	Recommended materials for containers or container linings use mild steel, stainless steel. Not suitable :
	Some synthetic materials may be unsuitable for containers or container linings depending on the material
	specification and intended use. Compatibility should be checked with the manufacturer.
	Keep only in the original container or in a suitable container for this kind of product. Keep container tightly
	closed and sealed until ready for use. Do not store in unlabeled containers. Containers that have been
	opened must be carefully resealed and kept upright to prevent leakage. Empty containers may contain
	harmful, flammable/combustible or explosive residue or vapors. Do not cut, grind, drill, weld, reuse or
	dispose of containers unless adequate precautions are taken against these hazards. Store locked up. Protect
	from sunlight.

APAR Industries Limited

Hygiene measures	stations and safety showers are close to the workstation location. Wash contaminated clothing before reuse.
	Recommended: Safety glasses with side shields.
Eye/face protection	
Skin protection	4 - 8 hours (breakthrough time): nitrile rubber
Hand protection	Wear protective clothing if there is a risk of skin contact. Change contaminated clothes at the end of
Body protection	working shift.
	Appropriate footwear and any additional skin protection measures should be selected based on the task
Other skin protection	being performed and the risks involved and should be approved by a specialist before handling this product.
	Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and
Respiratory protection	the safe working limits of the selected respirator. Use a properly fitted, particulate filter respirator complying
	with an approved standard if a risk assessment indicates this is necessary.
	Emissions from ventilation or work process equipment should be checked to ensure they comply with the
	requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering

Environmental exposure controls	modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
SECTION 9 PHYSICAL AND C	HEMICAL PROPERTIES
Appearance	Soft thick paste
Physical state	Paste
Color	Whitish Yellow
Odor	Oily
Odor threshold	Not available
pН	Not applicable
Melting point/Pour point	Not available
Flash point	> 200°C ,COC (ASTM D 92)
Evaporation rate	Not available
Flammability (solid, gas)	Not available
Flammability limits in air,	Not available
lower, % by volume	
Flammability limits in air,	Not available
upper, % by volume	
Vapour pressure	Not available
Density	0.92 max at 15°C
Solubility(ies)	
Solubility (water)	Insoluble in water

SECTION 11 TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute toxicity

No exposure limit value known			
Irritation/Corrosion			
Skin	No known significant effects or critical hazards.		
Еуе	No known significant effects or critical hazards.		
Respiratory	No known significant effects or critical hazards.		
<u>Sensitisation</u>			
Skin	No known significant effects or critical hazards.		
Respiratory	No known significant effects or critical hazards.		
Mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or		
SECTION 11 TOXICOLOGICAL IN	genotoxic.		
Carcinogenicity	The base oil(s) in this product is based on an severely hydrotreated distillate. The product should not be		
	regarded as a carcinogen.		
Reproductive toxicity	Contains no ingredient listed as toxic to reproduction.		
Specific target organ toxicity	Not classified		
- single exposure			
Specific target organ toxicity	Not classified		
- repeated exposure			
Aspiration hazard	Aspiration hazard - Category 1		
Information on likely routes of exposure	Not available.		
Potential acute health effects			
Eye contact	Eye contact may cause redness and transient pain.		
Inhalation	Inhalation of oil mist or vapors at elevated temperatures may cause respiratory irritation.		
Skin contact	No known significant effects or critical hazards.		
Ingestion	May be fatal if swallowed and enters airways.		
Potential chronic health effects			
General	No known significant effects or critical hazards.		
Carcinogenicity	The base oil(s) in this product is based on an severely hydro treated distillate. The product should not be		
3 ,	regarded as a carcinogen.		
Mutagenicity	No known significant effects or critical hazards.		
Teratogenicity	No known significant effects or critical hazards.		
Product/ingredient name	No known significant effects or critical hazards.		
Fertility effects	No known significant effects or critical hazards.		
Other information	Not available.		
Specific hazard			
SECTION 12 ECOLOGICAL INFO	DRMATION		
12.1 Toxicity	Not expected to be harmful to aquatic organisms.		
10.0 Demister of and demodels lite			

12.1 Toxicity	Not expected to be harmful to aquatic organisms.	
12.2 Persistence and degradability	Not inherently biodegradable.	
12.3 Bioaccumulative potential	Bioaccumulation is unlikely to be significant because of the low water solubility of this product.	
12.4 Mobility in soil	Not considered mobile.	
12.5 Results of PBT & vPvB	Not applicable.	
Assessment		
12.6 Other adverse effects	Insoluble in water. Spills may form a film on water surfaces causing physical damage to	
	organisms. Oxygen transfer could also be impaired.	

SECTION 13 DISPOSAL CONSIDERATIONS

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

Methods of disposal

Safety Data Sheet Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830.

Where possible (e.g. in the absence of relevant contamination), recycling of used substance is feasible and recommended. This substance can be burned or incinerated, subject to national/local authorizations, relevant contamination limits, safety regulations and air quality legislation. Contaminated or waste substance (not directly recyclable): Disposal can be carried out directly, or by delivery to gualified waste handlers. National legislation may identify a specific organization, and/or prescribe composition limits and methods for recovery or disposal.

SECTION 13 DISPOSAL CONSIDERATIONS European waste catalogue (EWC) Waste code Waste designation

Yes

APAR Industries Limited

mineral-based non-chlorinated insulating and heat transmission oils

13 03 07* Packaging

Methods of disposal

Hazardous waste

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

SECTION 14 TRANSPORT INFORMATION International transport regulations

IMO/IMDG ICAO/IATA ADR/ RID ADN Classification Classification Not regulated. Not regulated. Not regulated. Not regulated. 14.1 UN number 14.2 UN proper shipping name 14.3 Transport hazard class(es) 14.4 Packing group -14.5 Environmental No No No No hazards Additional information

14.6 Special precautions for User

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk

according to Annex I of MARPOL

73/78 and the IBC Code

SECTION 15 REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
