

APAR INDUSTRIES LIMITED

POWERING A SMARTER TOMORROW

Founded in 1958, APAR has evolved from a modest power conductor manufacturer into a global leader in electrical and energy infrastructure space. Renowned for its pioneering spirit, the company has embraced technological innovation and market expansion, extending its presence to over 140 countries worldwide

A purpose-driven enterprise, APAR's journey began under the leadership of Shri Dharmsinh Desai, whose foresight established a culture of engineering excellence and enduring value. Through successive phases of growth, the organisation has continuously strengthened its capabilities to meet emerging technologies and global demand, while retaining its Indian manufacturing DNA. As the brand enters its next chapter, focused efforts in marketing and communication, spearheaded by Ms. Gaurangi Desai Mehra, are helping the company focus on delivering superior, sustainable, and socially responsible solutions, thus fulfilling its mission of providing "Tomorrow's solutions today" for a brighter future.

SERVING GLOBAL MARKETS

Today APAR operates 10 advanced manufacturing facilities across India and

one in Sharjah, UAE. These world-class facilities empower it to deliver a diverse range of products, including conductors, speciality oils, lubricants speciality cables, crafted to meet the highest global standards. Each facility enables the company to serve utilities, industries and infrastructure developers across continents.

Listed on India's Bombay Stock Exchange and the National Stock Exchange since 2004, APAR has demonstrated consistent

performance and governance. Over the years, the company has strengthened its global presence while investing steadily in technology and people. Its vision is to deliver solutions that make energy systems more efficient, safer and environmentally responsible. With its focus on engineering strength, ethical practices and long-term value creation, the brand delivers on its promise of "Tomorrow's solutions today," thus reinforcing India's role in building reliable global infrastructure.

RESPONSIBLE BUSINESS PRACTICE

APAR places strong emphasis on responsible operations and social commitment. Certified as a Great Place To Work™, the company employs over 2,000 people and promotes a culture driven by innovation, accountability, leadership and entrepreneurial thinking. Its CSR initiatives support healthcare, education, rural development, gender equality, and inclusive growth, fostering positive impact in communities surrounding its facilities.

APAR drives India's future through R&D, global best practices, technology, and environmental stewardship, thus creating stakeholder value, supporting economic growth, and aligning with the Atmanirbhar Bharat initiative. The brand enhanced its sustainability efforts by raising renewable energy use to 36%, cutting water consumption by 21%, reducing energy intensity in cable plants by 8%, and lowering Scope 1 and 2 emission intensity by 12% in FY 2024-25, reflecting its strong commitment to minimising environmental impact and promoting ESG-driven growth.

INDUSTRY-FIRST LEADERSHIP

APAR is the world's largest manufacturer of aluminium and alloy conductors and India's largest exporter of speciality and renewable cables. It is also India's largest and the world's third-largest producer of transformer oils, a segment critical to reliable power transmission. Notably, APAR is the first and only Indian company to offer end-to-end solutions in copper and fibre hybrid cables. Through these efforts, APAR contributes to inclusive growth and aims to bring long-term benefits to society.

GARNERING ACCOLADES

Over years, APAR has earned several prestigious accolades. It ranked 154th on the Fortune 500 India list in 2024 and 155th on the ET 500 India list in 2023, and was named ET NOW's Iconic Brand of India in 2025.
